# Energy Alterations in Patients with Gastric Cancer

**Huang WL\****Medical Acupuncture and Pain Management Clinic, Franca, São Paulo, Brazil*

**\*Corresponding author:** Huang WL, Infectious Diseases, General Practice, Nutrition, Acupuncture, and Pain Management Specialist. Medical Acupuncture and Pain Management Clinic, Franca, São Paulo, Brazil.

**Received Date:** August 16, 2023**Published Date:** September 05, 2023**Abstract**

**Introduction:** Gastric cancer is one of the most cancer diagnosed nowadays and the third cause of death. According to traditional Chinese medicine, cancer comes from energy deficiency and the formation of internal Fire. The purpose of this study is to demonstrate that patients with gastric cancer have in the background, energy deficiency inside the five internal massive organs predisposing them to have cancer and the treatment of this energy deficiency condition is of paramount importance to treat the cause of gastric cancer formation and not just treating the symptoms, that it is the gastric cancer itself.

**Methods:** through two cases reports of patients with gastric cancer diagnosis. It was submitted to them for the measurement of the energy of the five internal massive organs (Heart, Liver, Spleen, Lungs, and Kidney).

**Results:** all of them were in the lowest level of energy, rated one out of eight. The treatment of this condition rebalancing the internal energy of Yin, Yang, Qi, and Blood using Chinese dietary counseling, auricular acupuncture with apex ear bloodletting, systemic acupuncture, and replenishing these organs' energy using highly diluted medications according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and crystal-based medications is of paramount importance to treat of the cause of cancer formation according to traditional Chinese medicine.

**Conclusion:** The conclusion of this study is to demonstrate that patients with gastric cancer have energy deficiency inside the five internal massive organs of the five elements theory of traditional Chinese Medicine and the treatment of this condition is very important to treat the cause of the cancer formation and it will be important to associate this treatment when the patient is submitted to gastric cancer management using Western medicine's approach.

**Keywords:** Gastric cancer; Energy; Diet; Traditional chinese medicine; Homeopathy; Hippocrates

**Introduction**

According to some studies found in the literature, gastric cancer is considered the fifth most frequent diagnosis of cancer and the third cause of death among cancer patients [1]. It is a multifactorial disease where the occurrence is usually combining genetic and environmental factors [2]. The occurrence of this disease can progress with the median age of the diagnosis being 70. However, 10% of the patients have the diagnosis at the age of 45 or younger [2]. According to Western medicine studies, the risk

factors to have gastric cancer is the high salt intake, *Helicobacter pylori* infection, and low ingestion of vegetables and fruits [3]. The diagnosis is usually made using endoscopy biopsy, staging using computed tomography, ultrasound endoscopy, laparoscopy, and PET [3]. The treatment of patients with gastric cancer includes endoscopic resection. The cases where the staging is a non-early operable gastric cancer are treated using surgery. There are cases where the use of chemotherapy perioperative can improve survival

in patients with stage 1B or higher cancers. In patients with advanced gastric cancers, it can be used sequential chemotherapy, but the median survival rate is about a year [3]. In traditional Chinese medicine, cancer comes from energy deficiency and Heat retention [4]. The purpose of this study is to demonstrate that patients with gastric cancer have in a background energy deficiency inside the five internal massive organs of the five elements theory of traditional Chinese medicine and the formation of internal Fire and the treatment of this condition is important to treat the cause of the cancer manifestation. The association of this kind of therapy is important in patients submitted to Western medicine's treatment to fortify the immune system of the patient to combat the malignant cells that developed due to this energy deficiency condition.

## Methods

Two case reports. It was also done a search for articles about gastric cancer in Western and traditional Chinese medicine in PubMed and they both gave consent to publish their history by giving an oral record of their history.

## Case Report One

I.C.M.O., 55 years old, female, received the diagnosis of gastric cancer at mid of March 2022 when she was submitted to gastric endoscopy, which revealed a malignant stomach tumor and a gastroesophageal reflux. At that time, she was not holding the food in her stomach after a meningioma surgery diagnosed in February 2022. At that time, her daughter was my patient and told me the history of her mother and all the difficulties with her treatment. I asked her to bring her mother to me to measure the energy of the five internal massive organs of the five elements theory of traditional Chinese medicine using a radiesthesia procedure.

## Results of the Case Report One

All her internal massive organs were in the lowest level of energy, rated one out of eight. The treatment of her condition consisted of Chinese dietary counseling, orientating her to avoid the ingestion of dairy products, raw food, Coldwater, and sweets (to not cause more energy deficiency in the Spleen and Pancreas energy). It was also advised she avoid the ingestion of fried food, eggs, chocolate, coconut, melted cheese, and alcoholic beverages (to not cause energy alterations in the Liver and Gallbladder). The third group of foods that I orientated her to avoid was the ingestion of soft drinks, matte tea, and coffee to not reduce even more the energy of the Kidney, responsible for the production of *Yin* and *Yang* energy. The second step in her treatment was to replenish the energy of the internal five massive organs using highly diluted medications according to the theory created by myself (2020) titled *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and crystal-based medications. I used *Calcarea carbonica* to replenish the energy of the Spleen and pancreas energy, responsible for the absorption of nutrients and the formation of Blood. It was also used *Silicea*, another homeopathy used by myself to replenish the energy of the Lungs which was also without any energy. It was used *Natrum muriaticum* to replenish the energy of the Kidney, responsible for the production of *Yin* and *Yang* energy among many other functions. It was also used

Phosphorus to replenish the energy of the Liver, which responsible for distributing the energy of the organs and storing Blood. The last organ that measured was the Heart and it used Sulphur to replenish the energy of this organ.

It was also prescribed homeopathy called *Carcnosinum* 200 CH 5 drops per day. I used in her case Chinese herbal medication called Ba Jen Tang but before I asked the family to take this homeopathy medication to the homeopathy pharmacy to dilute it in a very infinitesimal mode to not cause side effects to the patient, as shown in Arndt-Schultz Law, created in 1888 by two German researchers. The third step in her treatment was to do apex ear bloodletting to release the internal Fire, one of the energy imbalances responsible for the formation of cancer, in the energy level. I also used auricular acupuncture with apex ear bloodletting and systemic acupuncture to balance the internal energy of *Yin*, *Yang*, *Qi*, and Blood and take out the internal Fire. The points used will be shown in the discussion section. The patient was submitted to surgery to take out the stomach, but they used a dose of chemotherapy before this procedure because the gastric wall was very close to another tissue in the abdominal cavity, and they did it for more precaution. The patient improved from her clinical condition very fast, even with anemia, and because she was a Jehovah. It was also prescribed by the medical surgeon, Noripurum, and also, Erythropoietin three times per week. The patient received another quantum medication called *Anemona* (it is a quantum medication to increase the formation of Blood). The patient is very good nowadays, it is very happy with the results of this treatment because the medical doctors are saying that they could not believe that she is alive and are living quite a normal life as she had prior to the surgery she did to take out her meningioma in 2021. Before this disease, she received three doses of the COVID-19 vaccine. The first COVID-29 vaccine happened on August 14<sup>th</sup>, 2021 (Coronavac). The second dose happened on September 11<sup>th</sup>, 2021. The third dose happened on February 4<sup>th</sup>, 2022 (Pfizer). The fourth dose occurred on June 29<sup>th</sup>, 2022 (Coronavac).

## Case Report Two

B., 75-years-old male patient, with history of having weight loss, about 7 kilos since July 2022. He also was presenting jaundice and the doctors was suspecting that it could be the medications that the patient was using for the treatment of Alzheimer disease. He was admitted to the hospital, and they submitted him to an endoscopy, and they discovered that he was suffering from gastric cancer with metastasis to the Liver. In his family history (that has an Italian downwards), there were cases of gastric cancer. He has 7 children and was working at that moment as a security in a shoe factory in Franca, Brazil, during the night for more than 8 years. His daughter is my patient and she told me about the health problems of her father and I asked her to bring her father to my clinic to measure the energy of the five internal massive organs using the dowsing method.

## Results Case Report Two

The results of the measurement of the energy of the five internal massive organs revealed that all organs (Spleen, Heart, Liver, Kidney

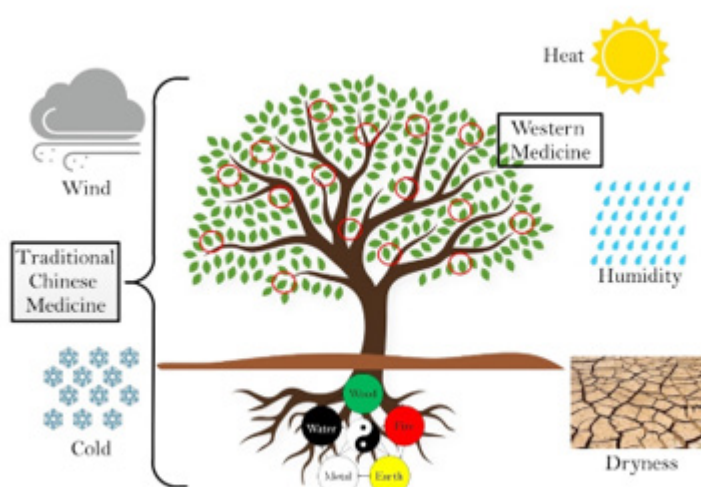

and Lungs) were in the lowest level of energy, rated one out of eight. The treatment of this condition consisted in change the wrong eating habits orientating the patient to avoid the ingestion of dairy products, raw food, Cold water and sweets because all these foods could induce more energy deficiency in the Spleen and pancreas energy, causing less absorption of nutrients and formation of Blood. The second group of foods that I orientate to avoid was the ingestion of fried foods, honey, eggs, alcoholic beverages, chocolate, melted cheese, coconut because all these foods could induce more formation of internal Fire, that it is one of the energy imbalances causing the formation of cancer.

The third group of foods that I orientated to avoid was the ingestion of coffee, matte tea and soft drinks because all these drinks could induce energy deficiency in the Kidneys' energy, responsible for the production of *Yin* and *Yang* energy. The other tools used in his treatment was to use ear acupuncture associated with apex ear bloodletting, to treat all these organs that are having low energy, to increase the function to produce more energy and regulate the interaction between *Yin*, *Yang*, *Qi* and Blood and the auricular points used in his treatment will be shown in the discussion section. The last tool used in his treatment was to replenish the energy of these organs using highly diluted medications according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine*. In this case, I toned the energy of the Heart using Sulphur, I replenish the energy of the Liver using Phosphorus, I replenished the energy of the Kidney using Natrum muriaticum, I replenished the energy of the Lungs using Silicea and finally, I replenished the energy of the Spleen using Calcarea Carbonica. It was also associated crystal-based medications to this treatment with the intention to replenish the energy of these organs. I also prescribed Carcinosinum, that it is a homeopathy medication used in the treatment of patients with cancer. The patient began this

treatment for about one month and after, he disappeared because he began the treatment using chemotherapy for about 6 months. After this period, his daughter called me saying that her father was very weak after receiving chemotherapy sessions. I asked her to bring him to my clinic because he needs to have energy-based treatment to have conditions to maintain the chemotherapy.

He was very weak at that time and the daughter said that her father did not improve his condition using chemotherapy, only worsened his health condition. The family resolved to stop the chemotherapy sessions and only use acupuncture and homeopathy to increase his energy. At that time, the patient was not eating, did not have appetite and was having some episodes of vomiting. I tried to perform acupuncture every day, but the patient needed to have nutritional support. He was refusing to insert the enteral tube to have nutritional support. I orientated them to ask the doctor at the hospital to insert the tube (made by silicone) after the stomach, in the duodenum and they inserted this tube. The patient was not improving much with this measurement and after about two weeks, the patient started to have much vomiting and also, feces in the stomach. What the doctors in the hospital discovered was that the tube was not in duodenum but in the stomach. The tumor increased in size and caused an obstruction in the passage of the foods that the patient was ingesting. The patient was submitted to emergency surgery this week (on August 7<sup>th</sup>, 2023) and is still alive. The doctors were surprised by his evolution because even without eating, he supports the anesthesia and the surgery very well. His daughter attributed the success to the treatment that he was having because he received the treatment before using acupuncture and also the use of highly diluted medications such as homeopathic (Phosphorus, Sulphur, Calcarea Carbonica, Silicea, and Natrum muriaticum) to increase the energy of his five internal massive organs to allow him to have forces to pass to all these problems.

## Discussion

**Figure 1:** The metaphor of the tree to show the different levels of diagnosis and treatment of Western and traditional Chinese medicine.

In this article, I will follow the commandments of Hippocrates (460 a.c - 377 a.c), the medicine's father, that said "it is more important to consider other ancient medical traditions prior to the knowledge we have nowadays". For this reason, I will use the reasoning used by traditional Chinese medicine, which existed for more than 5 thousand years to explain the energy alterations behind patients with gastric cancer [5]. I usually use the metaphor of the tree to explain the different levels of diagnosis and treatment between Western and traditional Chinese medicine, and it will be shown in Figure 1 (Figure 1) [6].

In the Figure 1, you can see that this tree is divided into two parts, the part above the earth and the part under the earth. The part above the earth is visible by the naked eye and this part is represented by Western medicine focus today. This part is composed by the trunk with several branches and each branch means one medical specialty. Coming out of each branch, you can see many leaves that mean one disease or symptoms treated by each medical specialty. In this case, gastric cancer is the "leaf" of gastroenterology specialty or oncology specialty, and all treatments aim to treat the "leaf" of this tree, doing surgery, chemotherapy focusing on

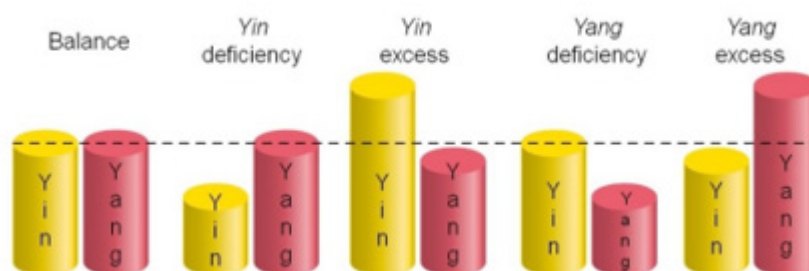

the tumor [7]. The main treatment of gastric cancer according to Western medicine's studies is resection by endoscopy [3]. When there is a non-early operable gastric cancer, there is the necessity of doing a lymphadenectomy of the peri gastric mesentery and the branches of the celiac arterial [3]. When there is advanced gastric cancer, there is the necessity to include chemotherapy starting with fluoropyrimidine and platinum with a median survival of 1 year or less [3]. According to traditional Chinese medicine, the symptoms presented in each specialty is not caused by the problems at the "leaf" level but the real cause is under the earth in the "root" of this tree. So, all localized problem in traditional Chinese medicine is caused by energy imbalances presented in the level, "oot" of this tree and this is the focus of this article to show which are the energy alterations behind all patients with gastric cancer [4, 8]. At the "root" of this tree, there are two theories of traditional Chinese medicine, that are *Yin* and *Yang* theory and the *Five Elements theory* [7,9,10]. *Yin* and *Yang* are two opposites but complementary forces that exist in all the things in this universe. Examples of this are the day and night, sun and moon, man and women, summer and winter, etc. They are represented by Figure 2 (Figure 2) [7,11,12].

**Figure 2:** *Yin* and *Yang* symbol.

The diverse energy imbalances between these two forces can cause clinical manifestation in the "leaf" level of the tree, as you can

see in Figure 3 (Figure 3) [7, 13, 14].

**Figure 3:** Diverse energy imbalances situation between *Yin* and *Yang* energy.

When there is *Yin* energy deficiency, the patient can present hot flashes, irritability, etc very common in women in menopause symptoms, as you can see in the article written by myself (2020) titled *Chakra's Energy Deficiency as One of the Cause of Menopause Symptoms in Women* [13]. When there is *Yang* energy deficiency, the patient usually can present Cold hands and Cold feet. The patient can present liquid retention, urinary incontinence, uterine or rectum prolapse, etc. as you can see in the article written by myself (2020) titled *Energy Imbalances and Chakras Energy Replenishment to Treat Patients with Urinary Incontinence and Sexual Dysfunction Post-Cancer Prostatectomy* [15]. The second theory presented in the

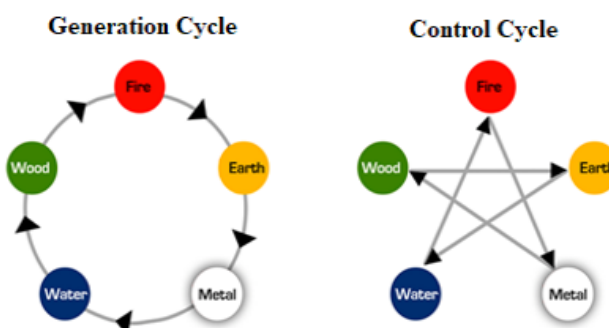

"root" of the tree is the five elements theory. This theory is very important to understand because it explains the main alterations that most people are presenting these days and also, in patients with any kind of cancer, in this case, gastric cancer [4, 16]. In this theory, the five elements correspond to Wood, Fire, Earth, Metal and Water and they have their representation inside the human body. The Wood corresponds to Liver, Fire corresponds to the Heart, Earth corresponds to the Spleen and pancreas, Metal corresponds to the Lungs and Water corresponds to the Kidneys, as you can see in Figure 4 (Figure 4) [9, 17].

**Figure 4:** The Five Elements and the organs that correspond.

In Figure 4, you can also see the generation cycle where you can notice that all organs are interconnected by energy flow and one organ sends energy to the following organ [18]. So, in this theory, one organ depends on the other organ and this way of thinking is different from Western medicine's perspective where they understand that one organ works independently or separately,

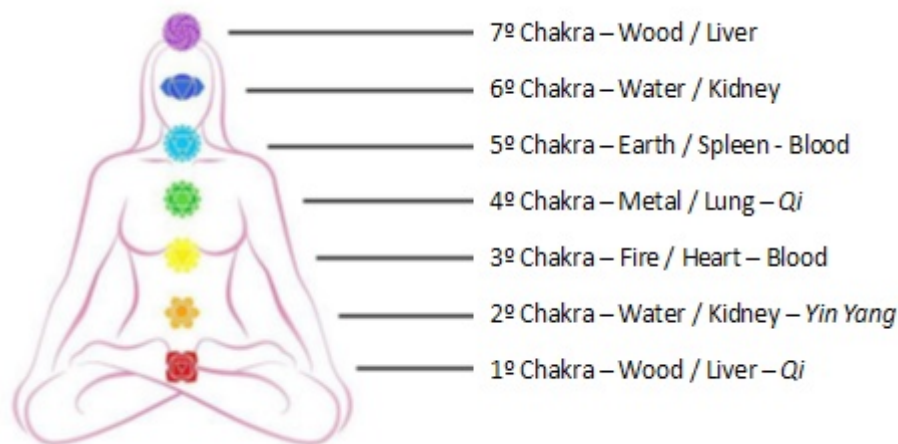

as said by Galen (ca. 129-ca. 199), a Greek physician that worked 500 years after Hippocrates (460 a.c - 377 a.c), and his thoughts is exerting influences in our medicine until today [9]. There is another way to send energy to these organs shown in the Generation cycle and to control the functioning of these organs called the Control cycle shown in Figure 5 (Figure 5) [7, 19].

**Figure 5:** Generation Cycle and Control Cycle.

These internal massive organs are responsible for the production of one specific energy for our survival and for the functioning of one external sensorial organ, as you can see in Figure 6 and Table 1 (Figure 6) (Table 1) [6].

**Figure 6:** The energy produced by each internal massive organ.

**Table 1:** The external sensorial organ (in yellow) that each internal five massive organs (in blue) are responsible.

|                   | Wood         | Fire            | Earth         | Metal           | Water         |
|-------------------|--------------|-----------------|---------------|-----------------|---------------|
| Orientation       | East         | South           | Middle        | West            | North         |
| Season            | Spring       | Summer          | Late Summer   | Autumn          | Winter        |
| Climate           | Wind         | Summer Heat     | Dampness      | Dryness         | Cold          |
| Cultivation       | Germinate    | Grow            | Transform     | Reap            | Store         |
| <b>Yin organ</b>  | <b>Liver</b> | <b>Heart</b>    | <b>Spleen</b> | <b>Lung</b>     | <b>Kidney</b> |
| <i>Yang Organ</i> | Gall Bladder | Small Intestine | Stomach       | Large Intestine | Bladder       |
| <b>Orifice</b>    | <b>Eye</b>   | <b>Tongue</b>   | <b>Mouth</b>  | <b>Nose</b>     | <b>Ear</b>    |
| Tissues           | Tendons      | Vessels         | Muscles       | Skin & Hair     | Bones         |
| Emotions          | Anger        | Joy             | Pensiveness   | Grief           | Fear          |
| Colors            | Blue/Green   | Red             | Yellow        | White           | Black         |
| Taste             | Sour         | Bitter          | Sweet         | Pungent         | Salty         |
| Voice             | Shout        | Laugh           | Sing          | Cry             | Groan         |

All diagnoses and treatments in traditional Chinese medicine lay in the energy flow of the four energies of *Yin*, *Yang*, *Qi*, and Blood, as you can see in Figure 7 (Figure 7) [20].

The diagnosis of energy imbalances of these four energies is made by asking the questions to the patients to evaluate if the patient has or not some energy alterations, as you can see in Table 2 (Table 2) [7, 21, 22].

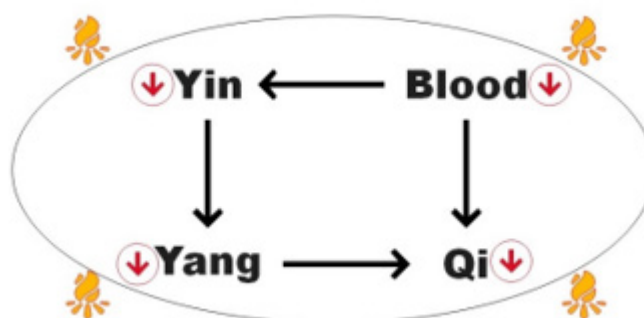

**Table 2:** Questions to evaluate the energy situation of each patient regarding *Yin*, *Yang*, *Qi*, and Blood and if the patient has Heat retention.

| Question | Does the patient have a daily bowel movement?                 | Does the patient have excessive sweating during day? | Does the patient feel cold in the extremities of the body? (Cold feet or hands) | Does the patient feel hot in the extremities? | Does the patient have dry mouth, bleeding gums, bad breath, acne and / or redness in the skin, abdominal pain, micro hematuria, or itching? |
|----------|---|--|---|---|---|
| Meaning  | The lack of daily bowel movements can mean Blood deficiency.* | This could be a symptom of <i>Qi</i> deficiency.     | Commonly, this is a sign of <i>Yang</i> deficiency.                             | Commonly a sign of <i>Yin</i> deficiency.     | Commonly this is a sign of Heat retention.  |

The patient can have Heat retention if there is one energy deficiency of *Yin*, or *Yang*, or Blood or *Qi* deficiency or a combination of these energies' deficiencies, as you can see in Figure 8 (Figure 8) [23, 24].

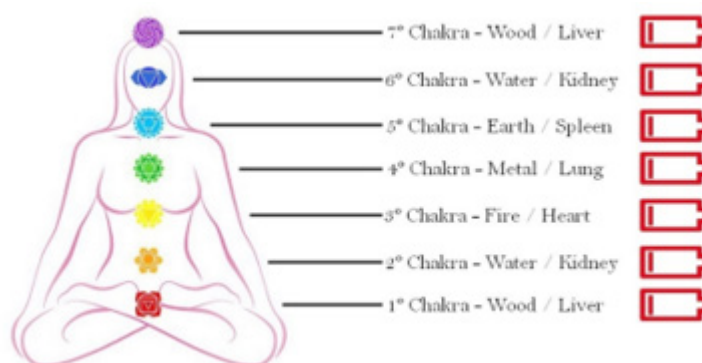

**Figure 7:** *Yin*, *Yang*, *Qi*, and Blood and the interrelationship among them.

**Figure 8:** The formation of Heat retention when there is an energy deficiency of one or a combination of energy deficiencies between them.

According to traditional Chinese medicine theory, cancer is formed when the patient has energy deficiency and formation of internal Fire, as shown in the article (2020) titled *The Importance of Treating Energy Imbalances and Chakras Replenishment for*

*Prevention and Treatment of Cancer* [4]. In the two cases reported in this article, both had energy deficiency proofed by the radiesthesia procedure measured using a pendulum made of wood as you can see in Figure 9 (Figure 9) [4].

**Figure 9:** Energy deficiency inside all internal five massive organs.

In research that I did in my clinic in Brazil analyzing 1000 patients' energy of the five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney), 90% of them were in the lowest level of energy, rated one out of eight, as shown in Table 3 (Table 3) [25, 26].

**Table 3:** Results of research that I did in my clinic in Brazil analyzing 1000 patients' energy of the five internal massive organs.

| Chakras Age             | 0-19       | 20-59    | 60-90                  |
|-------------------------|------------|----------|------------------------|
| 7 (Spirituality)        | 8          | 8        | 8                      |
| 6 (Memory)              | 1          | 1        | 1                      |
| 5 (Spleen)              | 1          | 1        | 1                      |
| 4 (Lungs)               | 1          | 1        | 1                      |
| 3 (Heart)               | 1          | 1        | 1                      |
| 2 (Kidney)              | 1          | 1        | 1                      |
| 1 (Liver)               | 1          | 1        | 1                      |
| AE (self steam)         | 1          | 1        | 1                      |
| Total of patients       | 26         | 170      | 86                     |
| Main Western diagnoses  | Anxiety    | Anxiety  | Anxiety                |
|                         | Depression | Headache | Knee pain              |
| Total diagnoses         | 11         | 105      | 37                     |
| Percentage              | 42,31%     | 61,76%   | 43,02%                 |
| Main Oriental diagnoses | Yin/Yang   | Yin      | Yin                    |
|                         | Yin/Blood  | Yin/Yang | Yin/Internal Heat      |
|                         |            |          | Yin/Yang/Internal Heat |
| Total diagnoses         | 4          | 38       | 28                     |
| Percentage              | 15,38%     | 22,35%   | 32,56%                 |

You can see that the majority of the population that I am attending in Brazil does not have energy inside these organs, meaning that the majority of the population is very immunodeficient I am showing in the article written by myself (2021) titled *Are We Vaccinating Immunocompetent or Immunocompromised People for COVID 19?* [26]

If I measure the energy of my patients today, in 2023, I will see that the majority (quite 100%) is very weak in energy, independent of the age group or the diagnosis presented by the patient [25]. Not only patients with cancer have this energy deficiency nowadays but

all kinds of patients, including babies are born with a lack of energy inside the five internal massive organs, as shown in the article written by myself (2021) titled *Energy Alterations and Chakras' Energy Deficiencies and Propensity to SARS-CoV-2 Infection* [25]. The progression from health to disease is divided into five phases and in the first three phases, there are energy alterations, but the laboratory exams are normal as I am showing in Table 4. Only in phases four and five, there are alterations in the laboratory exams. For this reason, Western medicine is doing the diagnosis in a late phase, when they can have alterations in the exams (Table 4) [4, 7, 17].

**Table 4:** The progression from health to disease is divided into five phases.

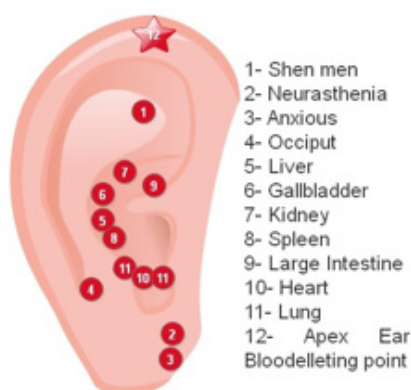

| Progression from Health to Disease |                                 |                      |   |                                 |
|------------------------------------|---------------------------------|----------------------|---|---------------------------------|
|                                    | Organ                           | Exams                | Energy Reserve                          | Symptoms                        |
| Phase 1                            | Slowing down of organ functions | Normal               | Energy Reserves-normal                  | Without clinical symptoms       |
| Phase 2                            | Slowing down of organ functions | Normal               | Consumption of internal Energy Reserves | With symptoms in another organ  |
| Phase 3                            | Slowing down of organ functions | Normal               | Consumption of external Energy Reserves | With symptoms in the same organ |
| Phase 4                            | Reversible cellular lesion      | Little alternation   | Consumption of blood Reserves           | Curable disease                 |
| Phase 5                            | Irreversible cellular lesion    | Excessive alteration | Metabolic exhaustion                    | Incurable disease               |

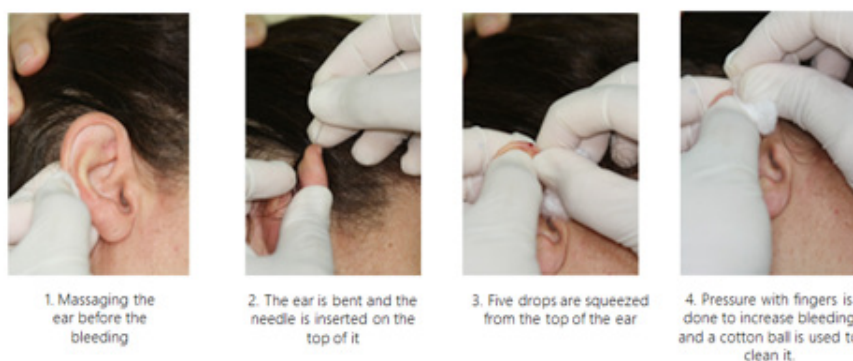

In another article written by myself titled (2021), *What Are the Markers That Predict the Development of Having Cancer in the Future Without Laboratory or Radiological Tests?* I am showing that when we do preventive exams to see if the patient has cancer such as mammography, we are not preventing the formation of cancer but only doing the diagnosis earlier [27]. But if we measure the energy of the five internal massive organs of the population and see that this energy is low, as it is occurring in our populations globally, we can prevent the formation of cancer by treating this energy deficiency situation, as I am showing in the article mentioned above [27, 28].

For this reason, the use of highly diluted medications to treat the energy deficiency situation of our patients is of paramount importance to treat the cause of the immunosuppression that is leading to cancer formation. Nowadays, I am using the theory created by myself (2020) titled *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and crystal-based medications to treat this energy deficiency situation. The reason that we need to use this type of medication to replenish the energy of these organs is according to Arndt-Schultz Law, created in 1888 by two German researchers. In this law, they said that the use of any kind of highly diluted medications can increase the vital energy of the patient and can reduce complications. In the

case of treatment of patients with any kind of cancer, we can treat cancer condition without using any kind of medications such as chemotherapy to treat the symptoms (that it is the cancer itself) as I am showing in the article written by myself (2022) titled *Energy Alterations in Patient with Malignant Thyroid Tumor and How Can We Treat It without Doing Surgery, Chemotherapy or Radiotherapy* [29, 30]. In this article, I am showing that all symptoms presented by the patient are only energy imbalances presented in the “root” of the tree, shown in Figure 1. In the case of gastric cancer, the patients also have energy deficiency presented in the root of the tree, as demonstrated in these two case reports. The treatment of this state together with Western medicine’s treatment for cancer was very important to give the energy condition to support all medications used by Western medicine’s approach such as chemotherapy and other medications [16]. In this article, I am showing that the dietary aspects are important measurements to balance the energy of the five internal massive organs, as said by Hippocrates (460 a.c - 377 a.c), the father of medicine, that “use your medicine as your food and your food as your medicine” [5]. The second step in the treatment was to do auricular acupuncture with apex ear bloodletting and systemic acupuncture to balance the *Yin* and *Yang* energy and the energy of the five internal massive organs, as shown in Figure 10 and Figure 11 (Figures 10, 11) [31].

**Figure 10:** Auricular acupuncture points used in the treatment of patients with gastric cancer.

**Figure 11:** Apex ear bloodletting is made to take out the Heat, one of the energy imbalances causing cancer according to TCM.

To replenish the energy of the internal five massive organs, I used highly diluted medications according to the theory written by myself (2020) titled *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine*. In this theory, I

used the medications created by Samuel Hahnemann (1755- 1843) but I used them to treat the energy alterations in each five internal massive organs, as you can see in Figure 12 (Figure 12) [29].

**Figure 12:** The five elements and the homeopathy medications used to treat them.

These medications should be used for the entire life of the patient because we are living in a new world where there is constant exposition to electromagnetic radiation, after the modernization of telecommunications and the implementation of 4G and 5G technology as I am showing in the article written by myself (2021) titled *Is the Population in the World the Same as in the Past?* and in another article also written by myself (2023) titled *New Global Immunodeficiency* [28, 32]. The use of any medication or vaccine or metallic implants inside the patient's body nowadays can induce more energy deficiency (and this energy deficiency situation is the cause of the formation of any kind of disease nowadays), and in this case, it is responsible for the development of cancer in any part of the body, as I am showing in the article written by myself (2023) titled *Which Could Be the Risk Factors for Developing Cancer After Receiving The COVID-19 Vaccine* [20]. Both patients reported in this article, they received the COVID-19 vaccine, as I demonstrated in the article mentioned above, and this kind of vaccine can cause a reduction even more of the energy of the patient, which was already very low and shown in the article written by myself (2022) titled *Why is Highly Diluted Oral "Vaccine" For COVID-19 the Safest Option in this Pandemic?* [32]

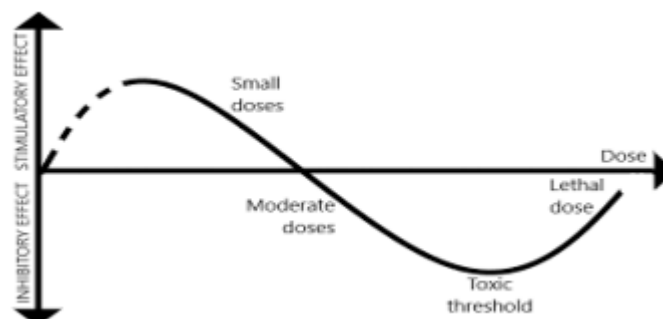

For this reason, the use of a highly diluted oral vaccine is the safest vaccine to be used in this new type of population that we have nowadays, due to this new type of energy presented in the patient [32]. Also, the medications usually used in the treatment of the majority of diseases used nowadays, are usually highly concentrated medications that can reduce even more the vital energy of these patients and can increase the chance to have cancer, as I am showing in the article written by myself (2023) titled *Can*

*the Medications we Use Make us More Likely to Have Cancer in the Future?* [34] The concentration of the medications is important nowadays because if we use highly concentrated medications, considered "scientific" since the implementation of the Flexner report in 1910, we will reduce even more the vital energy of the patients and can cause many other complications or even death of this patient, as demonstrated by Arndt-Schultz Law, created in 1888 by two German researchers and showed in Figure 13 (Figure 13) [35].

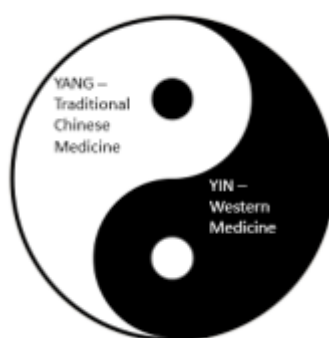

For this reason, the use of highly diluted medications is the medication of choice to be used in this new type of population that we have nowadays because can increase vital energy and in this case, can increase the immune system [35-36]. Another cause that we are usually facing nowadays is the use of metallic implants or prostheses in patients with orthopedic surgery as all the prostheses nowadays are made of titanium and can reduce the energy of the patients and increase the chance to have any kind of chronic disease, in this case, any kind of cancer in the future. The use of implants made of ceramic such as zirconium in dental implants is the safest option for patients that need to use this new technology to repair their teeth [37]. According to Hippocrates (460 a.c - 377 a.c) the father of medicine, he said that "natural forces within us are the true healers of the disease. For this reason, I am using tools in all these two patients reported in this article to increase the internal energy, which was proven very low, to use alone or in association with the treatment of patients with gastric cancer to give the energy support necessary to have more success in their treatment [5]. To finalize this article, I would like to say that all tools used in this treatment to restore the energy of the patient with gastric cancer

such as homeopathy and acupuncture are considered medical specialties by the Federal Medical Council in Brazil since 1980 and 1995 respectively [4, 6, 38]. To understand the energy alterations involved in patients with gastric cancer, we need to integrate the

knowledge of Western and Traditional Chinese Medicine to be aware of the alterations presented by the patients at the “leaf” level and the alterations in the “root” level of the tree as shown in Figure 14, in the metaphor of *Yin* and *Yang* (Figure 14) [7, 17, 39].

**Figure 13:** Arndt-Schultz Law.

**Figure 14:** The metaphor of *Yin* and *Yang* of integration of Western to traditional Chinese medicine.

The conclusion of this study is to demonstrate that patients with gastric cancer have in background energy deficiency inside the five internal massive organs of the five elements theory of traditional Chinese medicine. The treatment of this condition is of major importance to treat the cause of the gastric cancer manifestations even in patients that were in the treatment of gastric cancer using Western medicine’s approach to give the energy support to finalize their treatment without having much more complications, the worst of that is death.

## Acknowledgments

I would like to thank my Chinese herbal professor Dr. Lo Der Cheng for all his teachings to me understand the mechanism of the formation of diseases in the energy level. Also, I would like to thank all my patients because, without them, it would not be possible to learn the diverse forms of formation of diseases from this energy deficiency situation that we have nowadays.

## Conflict of Interest

No conflict of interest.
