Appendix
Informed Consent Form

Introduction

We are studying the use of alcohol and how it affects you, specifically your attitudes and how they relate to your use of alcohol as well as how the use of alcohol affects males and females differently. In order to help us, we ask for your participation in the study. There will be a short questionnaire about the use of alcohol and how it affects you along with some questions about your background. Confidentiality will be observed.

Since you will be participating freely, you may choose to leave the study at any time without penalty, but we hope that you will choose, instead, to participate. The study does not involve any physical or psychological harm to you. Please sign the following consent form:

Informed Consent Form:
