Introduction

I am an expert in Cybernetics and State investigator in field Health and Safety, namely in usage Medical Devices in EU. I am able to create Criminal Analyses in cases Patient Mortalities with false illegal Medical Working contrary rules Technical and Logical, contrary right Timing, Organizational, sequential partial activities in Medical Processing, including Technical Measurement, Safety Transporting, probable Waiting, duties realized the differenced Diagnostics...so as verifacated partial Biomechanical functionalities, with adequated planning and used IT supporting...always by all right defined actual crucial partial Aspects by principles of multilateral coherent step by steps realized Medical Working, actually "just in Time" defined actual momental guilted structure verification since by planning scheme of changes of Medical Qualities in Medical Work by rules Based Evidenced Medicine, -of course with respects to evaluate concanated partial elements and Events by sequential usage Binary Logics and so as by the principles random Samplings including!

I have been opened a New Epoche industrial continual consequently tested Safety in each partial elements in each partial activities in each legal Medical processing in Human Medicine OECD. We could rescue common Millions of Patients OECD yearly.

I should warning the Physicians in Medical branches lack of realized consequent mandatory forensic processing controlls by the harmonised Laws EU/CZ on all dangerous medical Workplaces

with adequated perfect defined legal levels "Health and Safety in usage Medical Devices" in Orthopaedy Tasks, Tasks in Medical Radiology, often negligent fraqmental defined reliable and verified Traumatologic Patient Plans, in Forensic Medicine often absented PATTERNS of Health Patient Clinic Documentation in all types Clinics, namely so as in Neurology, in Emergency Medicine... interdisciplinaire coordinates well timing, Efficiency sharing information about typical dangerous Comorbidities of Patients, consequently Protocolled Patient known Allergy Risks, there are often absence apothecary Tests on Sum of daily parallely used Sorted and right Safety Quantum, maybe with a Contraindicatieve influences of Medical Drugs weekly, timing of usage Drugs, etc.

There are yearly Mass repeated fatal dangerous Medical mistakes-with often very serious known probable Health consequents and often with needless heavy crippling Patients, often with inforced preliminary Patient mortalities!

I am offering you to implement systematic continual managing multilateral Medical Qualities all basal Produce all repeated Medical Health care in Clinics with similar common efficiency, as we are knowing minimize Risks from the Industrial dangerous activities since the Planning and managing, till finished Health care on Clinics-similar ways for Examples as we are knowing processing managing multilateral Qualities in produce Airplaines, in Computer maintaining, sharing the best implantings Samplings, Clustering method, with best archiving and training staffes, interpretation

suspicious RTG Images by Computer support in Space 3D, in fuzzy Images of Carcinomas, so as by comparison of EKG Images, skeletal MRI imaging with automatic individual Designing some individual DIAGNOSTICS and individual choiced of right individualized Patient TREATMENTS, automatic individual Processing Planning Individual Implants,, automatic Recording extremal dangerous activities in Surgery Halls parallely from a few Videorecorders, including with the terminated archived Videorecords , with more clever used more deep realized Clustering of Patients by the serious Diagnoses, by the choiced individual better specialty progressive experimental Treatments, with Independent continual inter-operational and Outputting Technical Controlls Health Status with consequently comparison relations Input/Outputs of Patient in Clinic, with immediately repairing some Medical Mistakes, training-serious probable risky "ad hoc Cases "; with carefully respects all dangerous partial multilateral managing Tasks by randomized simulated Samplings-with regards to Age, Gender, main Individual repeated some Comorbidities (Diabetes Melitus, Heart weakness, Vein bleeding, Trombotic complications, Osteoporoses, suddenly detect Carcinomas on Surgery Hall, etc", etc.

You should be in future more carefully, more better multilateral educated, more cooperated in your medical Teams, with respects, when a like hood Medical Processing as a sequential of partial Medical activities, you should be realized including right and timing well Measurement, with controlling Heart Arythmia, with right documented dangerous Aspects...by Technical, Organizational, right Timing, by reliable taken LEGAL Medical instruments-often of the defined Producer Product In voids, in realized LEGAL Measurement procedures..which there are evidenced the right Technical equipments, with evidenced right Desinfects in all Workplaces Clinic, of course with testing including Hemorrhagic Infects risks, etc.

DO YOU REMEMBERING

IF we are verified at least the ONE illegal partial activities OR at least the One illegal partial false Aspects of Measurement OR there are found some illegal Absence a partial Medical mandatory activities OR absence of independent Controlls in completing Medical Processing-THEN THERE ARE ALWAYS SUMARISED WHOLE MEDICAL PROCESSING EVALUETED as RESULTING ILLEGAL MEDICAL WORK, definitely!

Of course you should respect consequently the principles used rule sof BINARY LOGICS, STATISTIC SAMPLINGS, Competency, right respects to relations to Physics-often to BIOMECHANICS-and your should be informed about acceptable Events in Dental Praxes in workaday of Dental Clinics, -it should be realized more wisdom and more carefully, more Safety for Patients and explicit guaranteed-LEGAL WAYS IN DIAGNOSTICS, in individual choiced of TREATMENTS with Patient Agreements and with more deep multimodal verified and timely Re-Tested knowledges Physicians. We should stop to repeat similar Mass Medical Mistakes in similar Medical Workplaces, in similar Clinics, in mutual regular comparisons Efficiency with similar best of Clinics WHO, OECD!

Of course, I am able to realize with you more building more clever Radiology, Dental Clinics, Orthopaedy Clinics---with more clever used progressive Artificial Intelligence in short Future and

with mutual multilateral regular clever comparison main Qualities Yearly Produce similar Health care better year to years, with the best implement of best experiences mutual similar Dental Clinics in the World Health Organisation, with more systematic and rapidly SHARING VERIFIED THE BEST PROGRESSIVE DIAGNOSTICS AND TREATMENTS! There should be evidenced the Tendences better efficient Health Results year to years...

But Sorry -I am just heavy needless crippled in CZ Orthopaedy - I am just needless preliminary dying after many concatenated fatal trivial Mass Medical Mistakes namely in Logics and in BIOMECHANICS, in false illegal Processing Planning in CZ Orthopaedy, in false beginning the Inter-operational medical processing controlls without respects to legal completed Documentation, Health status of the Patients,, for example see you ignoration the legal respects Input Health status of Orthopaedic Patient „Preliminary declination of my femoral right neck“ there are absurd to begin working on the Surgery Hall, without the Orthopedic Plan of Implanting set T.H.A. There are absurd detect TOO LATE realization the post operational RTG Imaging 3 days after Implanting set T.H.A., contrary The Directive 93/42/EEC Medical Devices -with illegal CRUMM placement of the Stem-by intuitive observing Hip joints-with hitting the Stem in hands, -by the views, by the ways-and controlling testing till 3 Days later!... on the first post operational RTG Image since November 16, 2007, when there are mandatory Duties to used the Producer Installing RTG Masks--.. My Orthopaed was working with tragic substitute the Virtual Coaxialities only between the Stem and the right Femoral Cavity! with tragic real acceptance the tragic illegal DYSCOAXIALITIES about 13,68 Grads!!.....then there were TOO LATE ILLEGAL DETECT THE CRASH about 11 days later in the other Rehabilitation Clinic Malvazinky, Prague 5, CZ...and then there are realized TOO LATE,-the next Orthopaedic REOPERATION T,H.A since November 30, 2007, as correcture femoral bones and with New placement the dicker Reoperational Stem, but with Ignoration Colaps Nervi Ischiadici with absence Traumatology Planning Neurosurgery of fully Plegia Nervi ischiatici!

.....Sorry, but it was a next tragic crippling my body-with visible ignoration fully plegia of my Nervus Ischiadici since primary Orthopaedic Surgery in November 13, 2007 in my whole right under knee. It was me heavy crippled forever-and extremal it caused me dangerous Life growing next risks for duration of my next Life.

Of course there are countable with 8x worse Bayssian growing probable risks to repeat happened my_spontain fall in duration 6 years, of course with immediately more higher probabilities of my suddenly mortality-on the Diagnose "Repeated spontain breaking my femoral right joint by fallen again"! I have got „the Cock steps“ for ever, with always since year to years next destucture the placement of skeletal pan io false replacement behind, there were casual inforced me fully plegia of Nervi Ischiadci in whole right under knee_ including of destructure my muscels on the calf, with cinstan more worse circulation bleeding in my feet, false walking with fully plegia Achille_tendon, with plegia of toes, etc. Tragic Medical case to show internationally "Acceptable Medical Orthopaedic Work by CZ Court trials 2009-2012, as-Implantation set T.H.A. „in usual Limits Qualities Lege Artis CZ in CZ O9rthopaedy“.

There are for me many unbelievable experiences with the CZ Justify and Stupidities in CZ Court Message with fatal repeat Nonsenses biomechanical, geometric, false technologic processing with many fatal medical technical Mistakes, so as with the next financial juristic derived satisfactions for heavy crippling CZ Patient and for the external shorten my _ private Citizen rest Life many years! Yes,

I am just nearly crucified by Medical high educated my CZ Physicians -CZ Orthopaeds, CZ Radiologists, CZ forensic Physicians, CZ Jurists, CZ Ombudsmans, etc.

.....then there were for me year to years worse false teak and Collapsing Vein bleeding in my right feet, there were in whole feet Cracking Dermatologic Surface on the right Heel similar as in the Diagnose "Pseudo Diabetic feet!" it was protocolled as a new horrible unhealing Diagnose on Chirurgic Clinic VFN Prague 2, CZ since the April 2021, but the Rescued Vein Revitalization of Bleeding in my feet was realized extremal TOO LATE illegally-till in October 5, 2021-with heavy poisoned whole heel and so as my Feet with cracking Wounds- later with Feet bone with the incurable Stafylococci Poly-Infects! There were absence to revitalization Bleed circulation in fee and the repacking and disinfects Wounds and prescriptions of Antibiotics - it never could be sufficient common the adequate Medical Activities to rescue my Leg and my Life together!

Then it caused on Geriatric so as on the Chirurgic Clinic a Reason to enforce me the Rescued Shank-Amputation in December 28, 2021 TOO LATE...it caused me in sport horizon a few keks a exwaiting the Relaps of my Leukemia B-CLL since February 17, 2022 and it shorten sure the Rest of my Life, My scientific Article is probable a Adie with next publicity, so as with my Life as a needless Victim of CZ Physicians Mass stupidities to undertaken Artificial Intelligence in CZ Human Medicine..

"By the CZ Court Trial and by the Judgement No.36 C 181/2009-221 since September 24, 2012, it was paraphrased like as acceptable Medical Work "in Limits Lege Artis CZ", despite it was many times defined as fully ILLEGAL MEDICAL ACT, namely in beginning fragmental Traumatology Plan Orthopaedy-without regards to respect so as Plegia of Nervus Ischiadici in whole right under knee.... there were detected many defined Medical mistakes contrary explicit Technical Requirements the Directive 93/42/EEC Medical Devices!

I am just powerless and needless dying contrary my private CZ Constitutional Human Rights to -contrary respects to the principles:

To be live,-to be Healthy,-be with right CZ Health Cure in level of rules Based Evidenced Medicine, -But my CZ Court trial was realized contrary CZ Constitutional Human Rights to be participated do as a Czech Citizen Claimer in the independent justified CZ Court Trials, -with duties of the Judge dealing including to Regards with my justified independent verified criminal evidences to case including-I have sent him in Official Recommended Letter since July 17, 2012, so as parallelly to all other Participants of the CZ Trial No. 36 C 181/2009-it means it was addressed in hands too-of the forensic Physicians as a Head of Medical Team, which created the biomechanical false the Court Medical Message No. 36 C 181/2009-123 since March 27, 2012-but the explaining my Diagnose "Fausse

route Stem" as impossible to realize as a results of the_spontain Post-operational Patient Fall by_harend, such substitute of criminal Traces are PHYSICAL IMPOSSIBLE PHENOMENON-IT IS ABSURD PHYSICAL HYPOTHETIC EVENTS, because r Criminal Tracing of the Metallic Spike of the Component the Stem was placed IN CRUMM DIRECTION with punctuate destructured my femoral Cavity in date November 13, 2007 on the Surgery Hall in the Orthopaedic Clinic in the Regional Hospital Mladá Boleslav, when I was in fully Anesthesia by implanting set Total Hip Arthroplasty-CRUMM, with Biomechanical Dysfunctionality, it was wisdom realised as an ILLEGAL MEDICAL ACT!

Yes, I was working as the Head of Department 2002-4 "Health and Safety, Occupational legal conditions" in competency MOLSA CZ, there were realized all with my duties participations to excluding namely the fatal Mass risks in the Produce the Electric Energy in the CZ Nuclear Power Stations 1998-2002 with real dangerous risks evidenced-LOWER as relative frequency.

1: 10 million dangerous decision situations in duration for next 10 years!

When I have read the Medical Research Message WHO since year 2010, there are horrible resulting usual frequencies of fatal, medical mistakes in Diagnostics OR in right choiced of the Treatments in average only

1: 10!!!!

It means in all Medical branches of a human Medicine in all countries of World Health Organisation, it means there are the continual being wisdom Genocide of Population Patients WHO... with Mass repeated Mass Stupidities of Physicians against Health status of all Living Citizens WHO!

We should stop it by usage the industrial continual testing Legalities of each Medical Processing step by steps-in all Branches of Human Medicine WHO, OECD as we are knowing the Guarantee in CZ Industrial branches for example in The Produce and Usage of Airplanes, Cars, Computers, Weapons, Cosmic Rackets, Machinery... etc.

Of course so as we will be engaged with your practical active motivation to change common all Medical workdays with Guaranteed Qualities in all branches Human Medicine, including similar working Dental Clinics WHO, with modern usage Medical Devices, Equipments, with modern Medical Imaging, with Robotics, with modern Clustering the Streams of Patients, with regards to patient AGE, COMORBIDITIES... with usage computerized many Processing-namely Diagnostics, Planning Treatments, with continual Testing each partial Medical activities-IT MEANS TECHNICAL SO AS MEDICAL, TIMING, ORGANISATIONAL...PARTIAL ACTIVITIES in each Medical Processing, with usage random Samplings including and creating regular "Yearly Audit Qualities produced Health care" in each Dental Clinic with regular mutual comparison similar Efficiency and Health and Safety with similar multilateral cooperated Clinic net WHO!

Used Expertised Literature:

1. Set of Health documentation of the Claimer Ing. Antonín Cuc to case No. 36 C 181/2009-Regional Court Prague, CZ,

with the Judgement No. 36 C 181/2009-221 since September 24, 2012, with the false Court Medical Message No. 36 C 181/2009-121 since March 27, 2012 from the Forensic Medical Department of the Central Army Hospital Prague 6, CZ with false biomechanical explanation the "Crash Fausse route Stem", as "a spoutain Post operational Patient Fall after perfect preliminary right implanting set IMPLANTS Bicontact S", noncemented, from the Producer B. Braun, Germany, Nominal Dimension metallic Stem 13 mm, Design Type "N", Surface PLASMAPORE, with "CE" Marking for mutual Conformity Assessmentgilted in all States EU. This is impossible physical arguments, contrary CZ Constitutional Human Rights of CZ Citizens!

2. Set of my scientific published Articles about many parallely controlled aspects "Health and Safety" as a State Supervisions in Medical Implantiing by explicit Technical Requirements by the Directive 93/42/EEC Medical Devices, see LinkedIN, Profile "Antonín Cuc, since 2010-2020, including usage Samplings, systematic verified Medical Hypotheses by BINARY LOGICS, by Criminal Technical Analyse, by LEGAL CONDITIONS in CZ Hospitals, by rules BIOMECHANICS, by Assembling prescripted Mechanical accuracy GEOMETRY 3 D of Product with „CE“ marking, verified biomechanical right assembling the set Total Hip Joint Prothese-in the Human body-in right preliminary Processing Planning so as by specific documentation with harmonised Situation "preliminary natural Patient declination of the right femoral Neck RTG since September 2007, RTG Department, Policlinic VFN, Karlovo nám, Prague 2, CZ", with realized all partial sequential activities WELL, Legal, Technical, Timing, with Documentarian Clinic Patient set-consequent controlled and structured, just in time in beginning Activities

on the Surgery hall, including BIOMECHANICAL TESTS OF RIGHT ASSEMBLING COMPONENTS before the last Surgeon sewing Wounds of the trajectory of the Scalpel by WATSON-JOHNSON Inputting Join-Crack, typical risks, so as in the first post-operational orthopaedic RTG controlls by Imaging by industrial usage Computerized Geometric SW 3 D RTG, and with the installing the Firm Radiologic RTG installing Producer Masks in Space 3D, etc.

3. Dungal, P. and coll.; Orthoúpady, Czech multilateral representative Medical Encyklopedy, the first Eddition, Grada Publishing, Prague, 2005, many times with Re-edition, there are about 1244 pages of medical educated and explaining texts with many Schemes, Pictures, Photos, Invids, described Processing in contextual relation to right human walking, running, dumping-typical Diseases, Diagnoses, RTG Images, Disasters in Sport in Working activites, Disasters in Cars, in Building, in Maining, in Geriatric dangerous Falls, in Polytraumatic Disasters, Relation to efficient Rehabilitation, to Traumatology, to Medical Radiology, to Oncology, to Osteoporoses, Children in Orthopaedy, Usage and Designing Orthopaedic Implants, Biomechanics and duration of Implants, new Medical Devices, Individual Medical Devices in common Market EU, etc.

Annexes-Some Image RTG from the Archived Part of the Claim-judicial Case No. 36 C 181/2009, CZ Regional Court Prague, CZ and parallely from the Claium Health documentation Patient A. Cuc Chirurgic Clinic so as in set Clinic Patient in the Orthopaedy Clinic Regional Hospital Mladá Boleslav, November 28,2007CZ, reprint, Criminal Analyses:: 2009, 2021, 2022 (Figure 1).

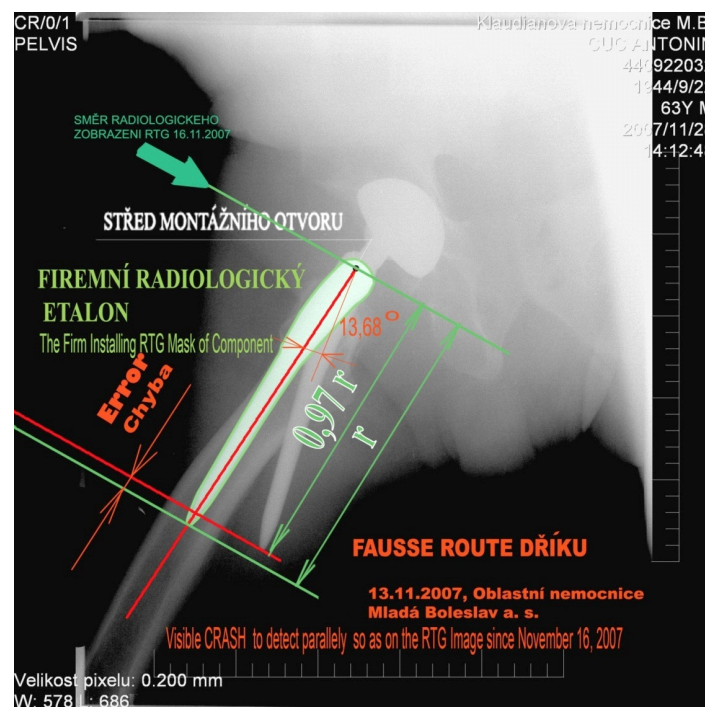

Figure 1.

The secondary post-operational RTG Image since date November 28, 2007

•Realised before ORTHOPPAEDIC REOPERATION since November 30, 2007.

Forensic Technical Geometric Analyse of Criminal Imúplementing Medical Act „CRUMM IMPLANTING THE STEM-

Fausse route Stem“, the Product Bicontact S NONCEMENTED, with,, CE Marking“, The Producer B. Braun, Germany, noncemented set T.H.A, surface Plasmapore, Nominal Catalloque, nominal Dimension Stem 13mm, false placement since Surgery Hall, Regional Hospital Mladá Boleslav, CZ, Surgery CRASH Fausse route Stem, realized since date-November 13, 2007, Orthopaed MUDr. František Vurm (Figure 2).

Figure 2.

There was protocolled Diagnose,, Colapsing Vein Blood circulation in right feet“, firstly Medical hypothese was protocolled on the Policlinic, VFN, Prague 2, CZ since April 2021 on , but the Rescued Vein Surgery was realized TOO LATE, illegal, till October 5, 2021, there were fully poisoned deep skin, Wounds on the Feet, critical Health status in duration of October 2021, there were worse and deep destructured Feet, till to feet bone, since the November 20, 2021 there were visible poisoned the surface of the feet bone and in the beginning of November there were detected

the Markers of Stafylococks Poly-Infects in surface of Feet bone, TOO LATE then there were needless realized daily desinfects and repacking of the Wounds, so as additional prescribed Intervenosse many sortes of Antibiotics only! Then it was inforced me “Rescued Shank-Amputation in right leg“-despote there should be applicated efficiency „The Rescued Vein Revitalisation bleeding“ circulations could be realised sometimes since Mai 2021, OR in June 2021. OR in July 2021-without tragic crippled my Health status for ever, with,,Shank-Amputation“.

Figure 3.

As the casual consequences after a few weeks after the Shank AMPUTATION, I have diagnostic „Relapsing of comorbidities, namely Leukemia B-CLL since February 17, 2022, + Heart fibrillation ARYTHMIA since March 2022. It shorten my predicted Rest of my Life many years needless was shorten, but my CZ Orthopaeds, my CZ Surgeons, my CZ Traumatologists and the CZ forensic Physicians are smiling me till today, because it was all Medical Mistakes realised Illegally, but: „In usual acceptable Limits Lege Artis CZ“, despite it was explicit ILLEGAL CONCANATED MASS MEDICAL MULTILATERAL ACTS in my case, against principle evaluation Medical Processing by bases Binary Logics, so as contrary principles Based Evidence Medicine, so as contrary usage by rules Product „CE“ marking to evaluate sequential partial entities in routine “Medical Processing Implantation set T.H.A”! (Figure 3).

Then needless inforced me Traumatology: in Chirurgic Clinic VFN, Karlovo nám, Prague 2, CZ - The Shank-Amputation, realised since December 28, 2021 as a last possibilities Rescued my Life by drastic crippling Surgery Act, on Chirurgic Clinic VFN Prague 2, CZ, despite the Colapsing Vein blood circulation was Pasove to see

and accepted absurdly since end April 2021-without rational deep Diagnostuic Situation by Asking a prescribed Analyse Imaging timely “CT Veiu Bleeding” and without timely realised immediately Revitalisation Blood circulation by safety Chirurgic Vein Surgery in May 2021 OR in June 2021 OR in duration July 2021, etc.! It was then TOO LATE realised Vein Surgery: in October 5, 2021 with visible tragic fully poisoned whole right Sole with beginning Stafylococks Infects Wounds in many tissues including, probbably unhealing Infects Feet bone- By the Results asked of Patient Ing. Antonín Cuc, there was then realised RTG Forensic Analyse in The RTG Department since December 12, 2021.Chirurgic Clinic VFN, Karlovo nám., Prague 2, CZ.
